

# SUNRAYZIA MODERNISATION PROJECT

## Community Display & Information Sessions

### SUNRAYZIA MODERNISATION PROJECT - WHAT IS IT?

The Sunraysia Modernisation Project (SMP) is an infrastructure upgrade program that will modernise the irrigation supply infrastructure in the Merbein, Mildura and Red Cliffs Irrigation Districts to provide a year round supply to customers.

This will involve the comprehensive upgrading or replacement of the major components of the pumping and delivery systems. The quality of water and reliability of supply will be substantially enhanced.

The project is currently at concept stage and a detailed design has not yet been undertaken. Professional cost estimations have been obtained to give some confidence in the project estimates

You are invited to come and speak to our staff on a face to face basis about the proposed project and find out how it relates to your irrigation district. You will be able to raise any particular question that you may have about the project and you will either receive a direct answer or have your query taken for later reply if we cannot answer your question at the time.

Separate information sessions are being held for irrigation customers in each of the three districts. These information sessions will be repeated over the two week period shown below to allow customers the opportunity to attend. You should allow between 30-45 minutes.

### INFORMATION SESSIONS TIMES AND VENUES

Town	Location	Date	Time
Red Cliffs	Red Cliffs Club Function Room	Monday 17th August 2009 Tuesday 25th August 2009	Anytime between 4pm - 7pm Anytime between 3pm - 6pm
